

“The improvement in SPL, clarity and presence is dramatic. Many people commented on how fantastic it was to finally understand the announcer.”

– Charles Korecki, Technology Support Specialist at Walsh Jesuit HS

SOUND SYSTEM SOLUTIONS

INDOOR SPORTS VENUE

Be a part of the team

An investment that lasts

Legendary performance and reliability from two of the most trusted names in sports venue sound – the proven choice of stadiums and arenas the world over. Designed to take a beating, survive the elements and work year after year, our solutions come with the added value of the industry’s best customer support.

Controlled coverage

Indoors or outdoors, keep the sound focused where you need it. Achieve sonic clarity and control in the most challenging acoustical environments – from gymnasiums and playing fields to large arenas.

Ease of use

Simple zone and level controls for installed audio systems help staff and volunteers stay focused on the game. Great sound quality with minimal effort.

Speech intelligibility

Hear all calls clearly and never miss a play. Turn up the music to get the crowd going. Whether on the concourse or in the main seating areas, our solutions precisely address the audio needs of any space – easily networked, remote-controlled and monitored via our robust electronics, software and DSP.

Complete system for any venue

Our extensive speaker portfolio includes ceiling, pendant, portable and surface-mount models, giving you background and foreground music options to suit every space and every budget – always with best-in-class sound quality and reliability.

SYSTEM EXAMPLE FOR HIGH SCHOOL GYMNASIUM

System overview

EVH full-range loudspeakers provide highly intelligible full-range sound in reverberant and reflective spaces. EVF subwoofers can be added for additional low-end support in more spacious areas such as gymnasiums.

System benefits

Excellent audio quality and efficiency, combining bi-amped EVH and EVF systems with C series amplifiers utilizing FIR-Drive presets for performance optimization.

Protection against excessive power and overheating through tour-grade circuitry in C series amps.

System and group control and supervision through easy-to-use system software.

If you need it, we've got it

The EV-Innovation family of loudspeakers is designed to specifically meet the diverse requirements of installed sports venue systems. EV-Innovation currently consists of five system formats: compact two-way (EVC), horn loaded (EVH), front loaded (EVF), line array (EVA) and ultra-compact (EVU).

Models from each series may be mixed and matched for consistent performance across any installation, providing system designers with complementary building blocks to address the needs of a wide range of venues and acoustical challenges.
